

Nova Protocol: Supernova Burst Consensus for High-Throughput DAG Chains

Zach Kelling

Lux Industries

2024

Status: Consolidated

This paper has been consolidated into `lux-consensus-engines` for the Defense Distribution Pack. The Nova engine is now **Chapter 4** of that paper.

See `papers/lux-consensus-engines/lux-consensus-engines.tex` (or the compiled PDF `lux-consensus-engines.pdf`).

The content previously in `sections/` of this directory is preserved on disk for git history but is no longer included by the main document. Future revisions to the Nova engine should land in `lux-consensus-engines/sections/nova-*.tex` rather than here.
